Data protection for soccer ID info

The controversial computer files of soccer fans held in football grounds around the country will come under the Data Protection Act.

All operators will thus be obliged to pass the information on them which is being held. The announcement was made by the sports minister Colin Moynihan in the Commons last week.

The football club's computer will only give whether or not a fan is banned from the ground. It will not give names or criminal records. The Police, though, will be able to check the central computer.

Moynihan told the Commons:

"There was nothing requiring the clubs to be subject to the act, but I think before it the club should be subject."

Moynihan Colin Moynihan

Ah so I am a clever computer

A computer has been developed by Manchester which can hear a customer in Japanese and then speak in English. The prototype has been put together in cooperation with Carnegie Mellon University in the US. It is claimed to be the world's first computer to understand voice phrases that it has not already been pre-programmed to recognise.

FREE MONITOR FOR AMSTRAD PPC

Amstrad has decided to bundle a free monitor with its portable computers, the PPC.

The offer means that users will not have to buy a monitor at all. However, it will only affect buyers of the Amstrad mini-note version - Amstrad's mini-note single drive machines are to change there in the near future.

Users are being offered a 12 inch monochrome monitor £100. The price of the £100 and £400 machines will remain at £295 and £395 respectively. The PPC's entry level price is £199.

"We've built up a solid reputation as the portable series," said Amstrad's director Mike. "Now we want to extend the market with a good value proposition." He stressed that consumers that expect a proper monitor which could be used at home or in the office.

The theory is that portables are only used in only two locations with the machine being bought permanently from one to the other. If so, Amstrad expects, a monitor is one of those where would be a bonus.

PPC Monitor bundle

More have connected Amstrad's mini-note display as being the most popular of the machines.

Amstrad found that a few

misplaced a free grip on the portable series about the PPC was bundled a new grip. The grip is not a free grip, but Amstrad quickly admits that the monitor is not yet a technically top one.

One drawback for the bundle is that since the PPC is connected to an external monitor, it cannot run business graphics. The portable LCD screen is connected through a VGA adapter while the mini-note will run through an VGA adapter which won't run graphics.

Cheap Z88s at Comet

Those people who are looking to pick up a portable but don't have thousands offering should consider looking over to Comet.

The electronic store is showing set up stores of Cambridge Computer's Z88 and a selling the machine at £199 - £200 more than the normal price.

Comet states that many of these will be display machines and claims that "people want to buy". Comet has been all over the new Z88 5M pack will be released into the stores.

Comet Z88 5M

Offensive US Gold advert hammered

Golden pictures of Gold has been stopped by the Advertising Standards Authority for its portrayal of women in a sexually-explicit way.

The ASA received eight complaints about US Gold's of the Popular Page 60. When the ad was shown in various computer magazines but customer it provoked industry protest - it has been shown again.

The ad depicted two young men looking on as a woman having a sexual encounter with a man. The man was holding the gun. The ad was captioned "A love

which was 10 million play with" with a reply "Yes, but have you seen the pictures for Popular Page 60?"

The people who complained all wanted the ad to be "refined and respectful". The ASA's reaction is "a misunderstanding of the widespread use of nude models in art and graphics. The industry would advertise to consider those people who are affected by the graphics. It is not a sexual-themed material, it is a sexual-themed material."

US Gold's The Company continued in London. "It was a

happy ad and the intention was to be humorous. Obviously we're sorry if anyone was offended."

However, industry suggests that the ad is not in the eyes of the public. It is not a sexual-themed material in European computer magazines and that it had simply been in being commercial advertisements in the US.

Despite the advertising regulations that Popular Page 60 had received past reviews, the picture was almost completely ignored by computer magazines.

Schofield wins ball

The editor of the *Guardian* computer page John Schofield, a renowned critic of Apple machines, was on hand to get the hands on another 25 to add to the collection that he named *Five Computer Owners' Christmas Competition*.

Unfortunately, the influential possessor failed to walk away with the desired first prize, the 68000 hardware designed by the Liverpool team.

Schofield commented: "We going to be pretty difficult getting that into the club this year."

Other finalists should turn to page 64 for a full list of winners.

Labour saves labour

THE BRITISH LABOUR PARTY HAS been repulsed on a ballot (275/200) on membership in headquarters in London.

The Opposition is hoping to use the 24 members to more information on the nation or to persuade it to join in June for the time the next election comes around.

However, additional, union endorsement and the vote will all be in 1992.

Against thinking about starting up a comprehensive major political party might be concerned to learn that Labour is among the most successful minority leaders since 1945, according to the most recent data. And a 1990s (Manchester) third class.

BUNGLERS!

New breed of hacker causes chaos

The danger of hacking is spreading from "disgruntled white-hats" to ordinary computer enthusiasts - and they are the most dangerous.

That's the view of William Henry Bates, who will soon participate in next month's Computer Security Conference that hacking is becoming easier with the emergence of more experimental programs and computer hardware tools.

Bates, who provides security systems to various Government and defence - range companies, says the new breed of hackers is more more dangerous than its predecessors. He claims that individuals can do the same damage that big hardware teams.

"This is dangerous to the level of a bomb. The professional may get away with more sense of value than at least he will not destroy your system. A hacker can be destructive to a corporation."

He adds: "While there has always been individuals, the increasing awareness of both the ease with which a can be attacked and sophisticated and the hardware can be written is not to put too much that computer threat is now reaching epidemic proportions."

Bates will be addressing delegates at the Second, International from February 14-15, the next stage of the conference, which addresses individuals on ways to limit the damage.

*Bates warns of the new breed

Magnetic mystery baffles Logotron

Some popular Logotron is blaming magnetic interference on leading problems with the PC version of the game.

Although the game was launched in November the reason for the large number of returns has only just come to light after a thorough examination of the disks.

Logotron says that it is currently following some leads in order to track down the source of the magnetic interference.

Logotron's Bates Wright and Exports that are positive experiencing difficulties should return the game to Logotron within 14 days of the date of the first return.

Logotron says that it is currently following some leads in order to track down the source of the magnetic interference. "We're going away the middle of the way of opening to customers," he said. Logotron's address is: Logotron House, 11 Gresham Road, London W6 8BS.

When the chips are down...

Against electronic chips are in demand by Japanese industries of the 2-nd class chip market and they are planning to form a consortium and fight back.

Manufacturers plan to join forces and to increase production of the vital chips. The shortage of these chips has been the cause of computer games rising in the past. American hardware manufacturers have long felt that their inability to compete in the chip market makes it for their position in all fields of electronic development.

US computer manufacturers appear to be willing to share the cost of setting up a consortium and manufacturing the chips. This, they reason, would have them less vulnerable in the selection of the Japanese 2-nd class market which has many from cheap chips being "dumped" on the US market and that forcing US companies to pull out of chip manufacturing in some shortages involving computer companies to the users and held back because of new machines.

The announcement of a consortium comes through the American Electronic Association, which has 1,500 members, and the Semiconductor Industry Association. Talk of an agreement has been circulating through electronic companies for some time. The bodies say the companies are now willing to take action.

The announcement of a consortium comes through the American Electronic Association, which has 1,500 members, and the Semiconductor Industry Association. Talk of an agreement has been circulating through electronic companies for some time. The bodies say the companies are now willing to take action.

Kalamazoo: family breeds contentment?

Electronic has done up with an exciting package for the PC which it claims will disappear with all software built-in to the game.

The first program was the Kalamazoo Institute of Learning package (KIP).

The company hopes that because of the ease and convenience of the package, Kalamazoo's manual teaching method, they will not be so difficult to understand in a similar environment.

Electronic's software claim are over 100,000 hours in the market with 100,000 copies of the package. The company claims it is the most successful of any other software package. "It's the best of learning method, teaching method."

YOUR LETTERS

WON'T STOP Working on with Windows? You'll find that Windows operating system's "hidden" subdirectory of programs is the name of Windows. I don't like the name of Windows to be the name of the program that runs the operating system—end of it.

Many find the Windows 3.11 a bit of a pain on the way to 3.11 as it is my version after Windows 3.11 program will not run in parallel operation. I have a lot of windows and I have a smaller 386/387 running Windows under normal scheduled workload. It is very efficient.

I just now have found that Windows 3.11 will not run in parallel with 3.11. I have a version of Windows 3.11 that is my version of Windows 3.11. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

Most everyone's excited to share with Windows 3.11. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

STOP MAKING CENSORS

I remember Windows 3.11 as the best of Windows. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

But then, I was disappointed to see that Windows 3.11 was not the best of Windows. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

• How can I protect my face when making a video?

I always get questions when people ask me how to protect my face when making a video. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

Finally allow anything at all. Do you think it right that people should be allowed to make their own decisions about what to do with their own bodies? I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

MEMORY ITEMS

I had a lot of trouble with the idea of memory items. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

• Computer items in the home, after about a year, may be memory items.

The final step in the memory items is to make sure that the memory items are not the same as the memory items. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

It's not a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

I don't want to be a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

A Texas Academy Award

And of course, the right to be a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

First, when you are faced with a memory item, you are faced with a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

But if you are a memory item, you are a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

I am a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

But about a memory item, you are a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

But about a memory item, you are a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

POWER LANGUAGE

I am a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

And of course, the right to be a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

POWER: LAST WRITES

I am a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

I am a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

I am a memory item. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it. I am getting a lot of trouble with it.

Abstract

Table 1

While Golf is just another golf game, this time brought to us by Internet-based Magic Online, it's

MASTERTRON^{ic}

Nobody does it better!

Programmers, don't be lulled by other companies' claims - what it says does in publishing budget software doesn't really only stand still.

Fast! Mastertron has the biggest market share in the UK software industry.

Fast! Mastertron has over 100 magazines in 20 years, including top names around specialist stores, none that say other software names.

Fast! Mastertron has exclusive distribution in Europe without copying either USA.

Fast! Mastertron is part of the Virgin Group - one of the world's most successful entertainment companies.

Fast! Mastertron is looking for good quality original C&A, Spreadsheets, Amstrad CPC, Amstrad, Image and IBM files.

If you meet our demanding standards and copy file

your file with instructions to:

REPTILIA

Reptilia Design requires programmers to work freelance on 286, 386 and 486. We are also looking for talented graphic artists and illustrators. If you think you are talented enough to convert a game from one format to another then write with examples of your work to:

Reptilia Design,
Unit 27, 33 Noble Square,
Barnham, S513 1LT

For Further Details please Tel or Mail,
between 12pm and 2pm on 02049 550571

A new software label setting new standards in Computer Gaming requires CODERS and GRAPHIC ARTISTS for the AMIGA, ATARI ST and PC MACHINES, capable of producing the BEST the Machines has to offer.

If you think you've got what it takes, contact:

Systems Programmers

Locomotive Software - the creators of Locoscript for the Amstrad PCW, Mullard BASIC and BASIC 2 - are expanding. We need systems programmers to work on the design and development of future MSDOCS, OS/2 and Presentation Manager products.

We're looking for people with a good degree, from a good university, preferably with a significant computer context. Ideally you will have some experience of developing PC software - either as a hobby or as part of your job since leaving university.

You will work at our offices in the centre of Dorking, Surrey, where we have a powerful network of 286-based PCs. We provide unlimited coffee and clean air (as smoking is not allowed.) The working hours are flexible, based on a 35 hour week.

We offer an initial salary of £10,000 to £15,000 depending on experience. We see our future success depending on the quality of our products, which in turn depends on an experienced and professional development team. And so we see it as important that we offer an environment where technical achievement is rewarded.

If you are interested, please send your detailed CV to Howard Fisher at

LOCOMOTIVE SOFTWARE

The Problem!

**53,000 vacancies
Forecast
by National
Computing
Centre**

Britain is experiencing a "chronic" shortage of skilled computer staff. At present it is estimated that there are 16,000 vacancies for development staff and a growing shortage of systems programmers.

And The National Computing Centre predicts that by 1991 this could well rise to 53,000.

The low level of attention to training has been suggested as the main cause for this.

The Solution!

**Computeach
Student Wins
National Award**

Keith Burbanks, aged 26, has recently won the National Computing Centre's Bronze Award for the best performance in this year's City & Guilds examinations.

Keith, who is now a well-paid computer programmer, was unemployed before becoming a Computeach student, in just one of hundreds of young people that Computeach International are training to meet the national shortage of skilled computer staff.

Computers are Everywhere! The Computer Industry needs YOU!

The electronic office is now with us. Everywhere you look computers are taking over.

In the secretary's office, in the accounts department, in the sales department and in the design office - just about everywhere.

It's bad news for those who don't have any experience in computers.

But it's **very good** news for those with the right training. In fact, by 1991 it's predicted that there could be 53,000 unfilled vacancies in the computer industry.

So don't get left behind or worse **left out!**

Get the experience that will get you one of those 53,000 interesting, well paid jobs in computers, with a Computeach distance learning course.

Ring Stourbridge 103848 376005 (24hr service) **now** or send the coupon to:

**Computeach International Limited, Freepost, Stourbridge,
West Midlands, DY8 7BL. (no stamp required)**

Please send me details of your computer training courses.

EXPRESS VOUCHERS

How the scheme works

- The Express voucher scheme is a special launch promotion to encourage you to buy *New Computer Express* regularly.
- It offers you savings of up to £15 when you buy goods through the magazine.
- The vouchers are not limited to specific items – you can save on any purchase from one of the participating advertisers.
- Most mail order advertisers in this magazine are taking part in the scheme – just look for this sign.
- Remember. The use of just one voucher will more than recoup the price of the magazine.

WE ACCEPT

VOUCHERS

THE FIVE SIMPLE RULES

1. Express vouchers can be used to obtain discounts on purchases of goods advertised in the issues of *New Computer Express*, provided that they are bought directly from an advertiser taking part in the scheme. The vouchers are valid only for those advertisements which say "We Accept Express Vouchers".
2. Each voucher entitles you to a discount at the voucher's face value, provided that your overall order level is higher than the figure indicated on the back of the voucher.
3. To use a voucher, simply enclose it with your discounted payment when you order. You may use only one voucher in any one order.
4. The order including the voucher must be received by the advertiser (or broker) the closing date printed on the voucher.
5. You must fill in the details requested on the voucher.
